

IMPORT HEALTH REQUIREMENTS OF CANADA FOR
OVINE SEMEN EXPORTED FROM THE UNITED STATES

GENERAL CONDITIONS:

1. No person shall import ovine semen into Canada from the United States unless he/she does so under and in accordance with a permit issued by the Minister to ensure:
 - i) that the semen has been collected, processed, and stored in an approved animal semen production center;
 - ii) that the semen has been derived from donor animals whose health status is such that the risk of spread of animal diseases is eliminated;
 - iii) that the semen has been collected, processed, stored and transported in accordance with procedures which preserves its health status; and,
 - iv) that the semen is accompanied to Canada by an export health certificate of an official veterinarian of the United States Department of Agriculture (USDA) in order to confirm that these obligations have been fulfilled.
2. The import permit referred to above shall remain in force for a period of three (3) months from the date of issuance.
3. Ovine semen being imported into Canada must be accompanied by an official export health certificate in English or French issued by a full-time salaried veterinarian of the USDA or an official export certificate issued by an approved (accredited) veterinarian and endorsed by an official salaried veterinarian of the USDA that clearly identifies:
 - i) The import permit number, the name of the exporting country and the name of the issuing authority;
 - ii) the identification of the donor animal including:
 - a) the species name and commodity;
 - b) the breed and registered name;
 - c) the registration number;
 - d) the collection date and the number of straws; and,
 - e) the identification/markings of the straws:
 - iii) the origin of the semen including:
 - a) the name of the exporter;

- b) the full address of the exporter; and,
 - c) the name of the approved semen production center where the semen was collected, if different from b) above:
- iv) the consignment description including:
 - a) the total number of straws;
 - b) the serial number of the shipping container; and,
 - c) the number/markings of the official seal on the shipping container:
- v) the destination of the semen including the full name and address of the consignee.

NOTE: The export health certificate to be used is included in these requirements.

- 4. In the case of frozen semen, the semen must be processed and stored in the United States separately from semen not intended for export to Canada from the time of collection to the time of export to Canada, the minimum period of which must not be less than thirty (30) days.
- 5. In the case of fresh or chilled semen, the semen must be processed and stored in the United States separately from semen not intended for export to Canada from the time of collection to the time of export to Canada.
- 6. The semen must be exported to Canada from the United States without having been exported to any other country.
- 7. The semen must enter Canada through an inspection port in a container bearing an unbroken seal of the government of the United States.
- 8. The semen must be stored within the sealed container in ampoules, straws, or other receptacles that are marked in a permanent manner with:
 - i) the date of collection of the semen;
 - ii) the registered name and number of the animal from which the semen was collected; and,
 - iii) the identity of the approved semen production center.
- 9. No person shall remove ovine semen imported into Canada from an inspection port except:
 - i) in a container bearing an unbroken seal of the government of the United States; and,
 - ii) to an approved animal semen production center or other place approved by the Minister.
- 10. No person shall import animal semen into Canada that is contaminated by bacteria, virus or any other micro-organism capable of introducing disease in animals.

11. Where the person importing the animal semen fails to comply with any of the above conditions or the semen is found not to be from the animal source described in the accompanying official export health certificate, an inspector may order the person having the possession, care or custody of the animal semen imported into Canada to destroy it, return it to the country of export or deal with it in such other manner as the inspector may specify.

Health Certificate No. _____
(Valid only if the USDA Veterinary
Seal Appears over the Certificate No.)

ZOO SANITARY CERTIFICATE
OVINE SEMEN

Part A: IDENTIFICATION

1. Import permit number:
2. Species and Commodity: OVINE SEMEN
3. Exporting Country: UNITED STATES OF AMERICA
4. Issuing Authority: UNITED STATES DEPARTMENT OF AGRICULTURE
5. Donor Identification:

Regis- tered Name	Regis- tration Number	Breed	No. of Straws	Collec- tion Date	Straw Ident:

6. Consignment Description:

- a) Total number of straws: _____
- b) Serial number of the shipping tank: _____
- c) Number of official USDA seal on tank: _____

7. Origin of the Semen:

- a) Name of exporter: _____
- b) Address: _____

- c) Name of approved semen production center where semen collected if different than above:

Health Certificate No. _____
(Valid only if the USDA Veterinary
Seal Appears over the Certificate No.)

8. Destination of the Semen:

- a) Name of Consignee: _____
b) Address: _____

Part B: HEALTH INFORMATION

1. The donor ram has been resident on the premises of collection for the sixty (60) days preceding the initial collection of semen destined to Canada.
2.
 - i) The donor ram originates from a sheep flock which has been free from evidence of brucellosis, tuberculosis, leptospirosis, bluetongue, and enzootic abortion of ewes for the preceding twelve (12) months; and,
 - ii) the donor ram originates from a flock which has been free from evidence of paratuberculosis for the preceding thirty-six (36) months.
3. The donor ram is not the progeny of a sire or dam that was affected by scrapie and no case of scrapie has been diagnosed during the previous five (5) years in the herd of origin of the donor animal.
4. The donor ram was inspected by a USDA accredited veterinarian at the time of the collection of the semen and found to be free from evidence of communicable diseases to which sheep are susceptible. In addition, there has been no evidence of communicable diseases to which sheep are susceptible diagnosed on the premises of collection for the thirty (30) days preceding collection of semen destined to Canada.
5.
 - i) The donor ram was isolated on the premises of collection for at least the fourteen (14) days prior to collection of the semen for export to Canada; and,
 - ii) the donor ram has not been subject to any prophylactic vaccination for diseases to which sheep are susceptible during the thirty (30) days preceding semen collection.
6. During the fourteen (14) days immediately preceding the commencement of the isolation period through until the final collection of semen to be exported to Canada, the donor ram was not used for natural service.
7. During the period of isolation, the donor ram was subjected to tests for the following disease with

Health Certificate No. _____
(Valid only if the USDA Veterinary
Seal Appears over the Certificate No.)

negative results (date of test shown):

- i) Bluetongue: AGID or ELISA test
 Date of test: _____
- ii) Brucellosis: CF test for *B. ovis*
 Date of test: _____
- iii) Leptospirosis: microagglutination lysis test for *L. pomona* and *L. hardjo*
 Date of test: _____
- iv) Paratuberculosis: CF test
 Date of test: _____
- v) Tuberculosis: intradermal tuberculin test
 Date of test: _____

- 8. The donor animal is free of any evidence of known genetic defects and has not been shown to be associated with such defects in close relatives or with any reproductive disorder.
- 9. Permanent markings on each ampoule, straw, or receptacle of semen are to include the date of collection, the registration name and registration number of the donor ram and shown on the health certificate.
- 10. The semen was extended in a diluent to which antibiotics in generally accepted levels had been added and, to the knowledge of the certifying veterinarian, the semen is free from contamination by pathogenic micro-organisms.
- 11. The shipping container containing the semen has been sealed with a USDA approved seal. The serial number or markings of the seal and the serial number of the shipping container are to be shown on the health certificate.
